

AYEM

Asian, American, African
Young Expert Mission

You're working on an agro-ecological project ?
You're achieving it ? You're looking for an assessment ? Feasibility study, impact assessment, valorization project or an extended approach ?
The AYEM MJE is offering you its services.

What is a Young Expert Mission ?

A MJE is a development mission set up or the study of an expertise project by a team composed of 9 engineer students in fourth year at IS-TOM, Higher Education College of International Agro-Development.

As an aim, we're having a sustainable and human expertise in tropical agro-ecology . Our team will work with you during a year, integrating all our motivation and skills.

Our sponsor is a beneficiary of the project and can be an NGO, a cooperative, a company, an institution, or a development agency.

Our services:

- Impact Assessment
- Feasibility Study
- Project Evaluation
- Environmental Diagnosis
- Agrarian Diagnosis

Our fields of action :

- **Farmers' organization supporting** : production's valorization, producers' groups structuring, capacities strenghtening.
- **Development of agricultural sector** : production and commercialization studies, access to the market and partnership development.
- **Food supply** : self sufficiency reinforcement, products diversification, economical development.
- **Production systems sustainable integration** : identification of agrarian systems, methods to fight degradation : agroforestry, agriculture/breeding association, natural resources management.

Previsional schedule :

Our assets:

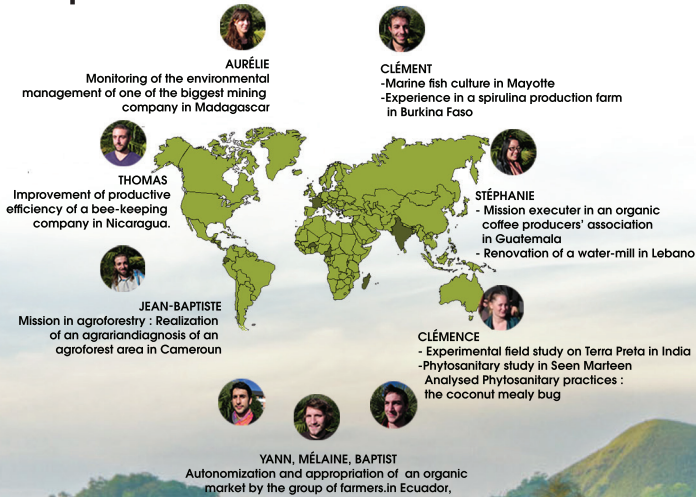

- A one year far-reaching study.
- A team composed of 9 students divisible on the field.
- Supervision by a professional team.
- Advantageous price.
- An experienced association with three experiences in developing countries.

Education :

4th year of a 5 years master level degree in international agro development.

Multidisciplinary course : agronomical, economics, social and political sciences (ecology, tropical breeding, management, statistical tools as main subjects).

Experiences :

Association :

AYEM is an association constituted in accordance with the French law of 1901 concerning non-profit organizations. Funded by 9 students, it is restarted each year by a new group of dynamic and professional students who realized a MJE in developing countries.

2013 : Feasibility study of organic certification and fair trade alpaca farms on the Bolivian altiplano, for AVSF.

2012 : Impact assessment of Komrong-Daikou project focused on farmers' organizations in Cambodia for AVSF.

2011 : Feasibility study of a reforestation program by planting Ravintsara on Rural Centre Patrak'ala in Madagascar, for Planète Urgence.
